A Picture Is Truly Worth A Thousand Words

Imagine - your own spectacular movie palace specifically designed for you, created to match your unique wishes to your unique space.

Design - Using state of the art computer technology, combined with over 20 years residential & commercial design experience, we provide detailed floor plans, elevations and realistic 3D render views.

Build - The experienced craftsmen of J.S. Heartwood, Inc. are available to construct your entire project. If you already have a trusted builder, we can provide detailed plans along with expert technical advice.

Our Services Include:

- Interior space analysis using 3 Dimensional CAD modeling.
- Architectural based home theater design
- Detailed plans printed to scale.
- Elevation details including site lines and speaker dispersions.
- Specialized construction & construction consultations
- Equipment placement and recommendations.
- Acoustical treatments
- Proper seating and platform configurations

We Work with ...

Homeowners

Our reasonably priced 3D CAD designs match the style of theater you want, to the unique space that you have. We are happy to work with your builder or you can let us build it for you. Contact us by phone or email and let us make your home theater the ultimate movie experience!

Audio Video Contractors

We regularly work with independent AV companies in our area. With the proper information, our specialized design services can be provided to Audio/Video contractors and their customers anywhere.

Architects

Most architects specialize in the general layout and structural design of a building project. Just as they usually do not determine kitchen details, most will not provide specifications for dedicated home theaters and media rooms. This is what we do.

Builders

Let us provide the expertise that will set your theaters and media rooms apart from all the others.

Interior Designers

Our main focus is the "functionality" of the space. We have some standardized themes that we recommend however when it comes to specific, customized aesthetic details we regularly work with decorators and interior designers.

Long Distance Designs

With the proper information, we can provide specific designs for specific spaces anywhere in the world.

Celebrating 20 Years of Service Excellence

Our outstanding record of service excellence is now in its 21st year. It is our personalized attention to our clients and our unwavering commitment to building your perfect home theater that sets us apart. Using the power of computer assisted drawing technologies, **J.S. Heartwood Inc.** continues to build on your ideas. Our 3D home theater designs make it possible to see your custom home cinema in the finest detail, before construction has even begun. A picture is truly worth a thousand words!
